

If these groups want all the laws to be the same, then the federal law should be changed to be like Wisconsin's. It's amazing to me that these groups are lobbying the government to allow them to harass people with unwanted solicitations as if they should have some kind of protected right to invade my quiet time or any of my time with their unwanted and often pushy solicitations. My life is better since getting on Wisconsin's "No Call list" - the unwanted calls have dropped off to almost none. Please leave our law the way it is and send these unwanted pests packing.
